This volume brings together a selection of essays by serving economists/advisers at the senior level in various central ministries, regulatory bodies, and policy think-tanks. Promoting evidence-based public policymaking, the volume addresses medium-term policy imperatives for the Indian economy. Rich in data and analysis, the essays cover a wide range of themes including macroeconomic policy for sustaining high growth, sectoral polices for meeting the stated national development goals, market reforms and sustainability, infrastructure development, and challenges of governance. While the focus is on domestic developments, contemporary global economic issues that have implications for the Indian economy are also addressed.
Chimedyn, 2010, Social Science, 283 pages. In the context of the current wave of global environmental concern, this book considers measures aimed at solving environmental problems, investigating the example of.
